Lifecare ASA

Continuing its path towards market launch – Q3 review

For Q3(24), Lifecare reported revenue and other operating income totalling NOK1.5m, down from NOK2.6m in the same period last year. The income is mainly related to R&D grants. Operating expenses rose significantly, to NOK21.9m, up from NOK9.5m in Q3(23), driven by increased personnel costs and intensified R&D activities. Cash at the end of the period was nearly NOK76m, excluding an additional NOK16.6m from the recent capital raise following the Euronext Oslo Børs listing in October. Note that we do not have any published quarterly estimates as the company has not yet entered commercialisation phase.

Lifecare reported several operational milestones in Q3. Preparations for the upcoming LFC-SEN-003 study are on track, with a draft of the study protocol now completed. The next steps involve presenting the protocol to regulatory authorities and partnering with a contract research organisation to assist in selecting clinical study sites. The company has identified potential process optimisations for the automated production of Sencell, and has partnered with TTP plc to implement these improvements by the end of 2024. Consequently, automated production is now slated to be ready by H1(25), with the veterinary market launch also postponed to H1(25) (previously H2(24)).

Following the report, we postpone the time for product launch slightly for both the veterinary and human markets. We now expect Sencell to be launched in the veterinary market in H1(25) (H2(24)) and human market in H2(26) (H1(26)). This has a limited effect on our sales forecast and valuation given that we have had a conservative view on the initial market uptake for the product in the veterinary market. We continue to regard the human market as the most attractive commercial opportunity for a product like Sencell. Our fair value range is NOK20–32 (22–34) per share.

Valuation and risks

Our fair value range is based solely on a DCF valuation. Conducting a peer valuation on Lifecare is challenging due to the lack of sales and positive EBIT, which makes valuation multiples irrelevant. Using the DCF valuation (including a funding discount of 10%) as a starting point, we take into account the potential for a better/worse performance and uncertainty surrounding terms and amounts of any potential future funding needs, and we arrive at a fair value range of NOK20–32.

In our DCF model, we estimate sales reaching NOK1.9bn in 2036e (NOK800m on risk-adjusted numbers). After this, we model a decline in sales growth due to potential competitors gaining traction in the market. The terminal year in our forecast period is 2043e, after which we model a perpetual growth rate of 2%. We expect Lifecare to reach positive FCF in 2030e and thereafter to continue to deliver growth under profitability. We assume a terminal EBITDA margin of 25%. We discount future cash flows using a WACC of 12%.

Risks

Competition and commercialisation risks

Commercialisation risks for Lifecare in the continuous glucose monitor (CGM) market include competing with established companies such as Abbott, Dexcom, Medtronics and newcomers such as Senseonics, which already has a proven presence and customer base. Senseonics' product – an implantable CGM – benefits from a first-mover advantage, having gained early adoption among diabetes patients. In our view, this presents a major risk as Lifecare must overcome the already entrenched position of its competitors. It will require significant investment in marketing and distribution to establish its foothold in the competitive landscape. However, a licensing partnership with an experienced major actor may partly or wholly mitigate these risks.

Leadership risks

Lifecare faces some managerial risks when it comes to operations, given its modest management team of just two members and the geographical division of its business operations between Norway, the UK and Germany. Management risks include the potential for overburdening the small team, maintaining effective communication and coordination across different locations, and the need for comprehensive strategic oversight. However, Lifecare benefits from the international expertise of its board of directors, which brings significant experience in diabetes technology and legal matters. Additionally, the company's scientific advisory board is composed of highly reputable experts in diabetes technology, clinical medicine and endocrinology, physics, and nanotechnology, which provides strong scientific and technical guidance.

Macroeconomic risks

Lifecare, as a global business, is exposed to numerous local and global economic risks. Weak economic performance in various regions may lead to reduced allocations of national budgets to the healthcare sector. To mitigate these country-specific risks, Lifecare aims to diversify its geographical exposure. Another macroeconomic concern is the current inflationary environment, which has triggered interest rate hikes worldwide. This poses a risk for Lifecare, as it may not always be able to adjust its prices to customers to offset higher cost structures.

Regulatory risks

As a global business, Lifecare is also exposed to numerous local regulatory risks. Relevant legislation includes regulations in the healthcare segment, trade barriers, competition laws, and requirements for medtech products and techniques. If regulatory authorities adjust their demands, it may lead to substantial delays and additional costs for Lifecare. As detailed in this report, there is significant uncertainty regarding the timing of regulatory approval for Lifecare's Sencell product in both the EU and the US. This is an area where we would prefer a clearer understanding of the regulatory strategy, and it is uncertain how much detailed insight Lifecare has into the process. We believe Lifecare's financial targets are heavily dependent on this launch.

Reimbursement risks

The complexity and variability of reimbursement processes across different regions can delay market entry and revenue generation. In the US, Medicare expanded coverage for CGM systems in 2023, which significantly lowered the reimbursement risk. CMS coverage has also been positively affected by that decision, which in turn has influenced commercial payer policies by creating a precedent for reimbursement. When Medicare, a significant government payer, approves coverage for a specific medical device or technology, it often encourages private insurers to follow suit, as it establishes a level of trust and validation in the product's clinical efficacy and cost-effectiveness. However, in other regions the situation with CGM is decided on a country-by-country basis, which creates some uncertainty on uptake in markets outside the US. Additionally, securing regulatory approval does not guarantee reimbursement, as additional evidence demonstrating cost-effectiveness and clinical benefits may be required, leading to potential delays and increased costs. Frequent changes in reimbursement policies can further impact the profitability of existing products and the feasibility of new developments, as criteria and reimbursement levels may change unpredictably.

Financial risks

Owing to the company's current cash position, it will, in our view, need to take on capital to run its business, unless it signs a licensing deal. There are no guarantees that it can raise the necessary capital at favourable terms, or that it can raise any such capital at all. Should it not manage to raise this capital, we see a risk to its continued operation. We believe the risk associated with its financial position is low in the short term, due to the recent rights issue, but elevated in the long run.

Disclosures and disclaimers

Carnegie Investment Bank AB

Carnegie Investment Bank AB (publ.) is a leading investment bank with a Nordic focus. The Carnegie group of companies, together "Carnegie", generates added value for institutions, companies and private clients in the areas of trade in securities, investment banking and private banking. Carnegie has approximately 600 employees, located in offices in six countries

Valuation, methodology, and assumptions

Commissioned research reports include the analyst's assessment of a fair value range over the coming six to 12 months based on various fundamental valuation methods. A commonly used method is DCF valuation, where future cash flows are discounted to today. Analysts may also use different valuation multiples, e.g. P/E ratio and EV/EBIT multiples, relative to industry peers to obtain a target price. For companies where it is appropriate, a fair value range can also be based on the analyst's assessment of a fair ratio relative to the net asset value of the company. Fair value ranges represent the assessment of the analyst(s) at the time of writing

Frequency of update

Carnegie's research analysis consists of case-based analyses, which implies that the frequency of the analytical report may vary over time. Unless otherwise expressly stated in the report, the analysis is updated when considered necessary by the research department, for example in the event of significant changes in market conditions or events related to the issuer/the financial instrument.

Analyst certification

The research analyst or analysts responsible for the content of this commissioned research report certify that, notwithstanding the existence of any potential conflicts of interests referred to herein, the views expressed in this commissioned research report accurately reflect the research analyst's personal views about the companies and securities covered. It is further certified that the research analyst has not been, nor is or will be, receiving direct or indirect compensation related to the specific ratings or views contained in this commissioned research report.

Potential conflicts of interest

Carnegie, or its subsidiaries, may from time to time perform investment banking or other services for, or solicit investment banking or other business from, any company mentioned in this report. Any such publicly announced business activity, during the past 12 months, will be referred to in this commissioned research report. A set of rules handling conflicts of interest is implemented in the Carnegie Group. Investment Banking and other business departments in Carnegie are surrounded by information barriers to restrict the flows of sensitive information. Persons outside such barriers may gain access to sensitive information only after having observed applicable procedures. The remuneration of persons involved in preparing this commissioned research report is not tied to investment banking transactions performed by Carnegie or a legal person within the same group.

Confidential and non-public information regarding Carnegie and its clients, business activities and other circumstances that could affect the market value of a security ("sensitive information") is kept strictly confidential and may never be used in an undue manner.

Internal guidelines are implemented in order to ensure the integrity and independence of research analysts. In accordance with the guidelines the research department is separated from the Investment Banking department and there are no reporting lines between the research department and Investment Banking. The guidelines also include rules regarding, but not limited to, the following issues; contacts with covered companies, prohibition against offering favourable recommendations, personal involvement in covered companies, participation in investment banking activities, supervision and review of research reports, analyst reporting lines and analyst reporting lines.

Other material conflicts of interest

This report was commissioned and sponsored by the issuer (issuer-paid research).

Distribution restrictions

This commissioned research report is intended only for distribution to professional investors. Such investors are expected to make their own investment decisions without undue reliance on this commissioned research report does not have regard to the specific investment objectives, financial situation or particular needs of any specific person who may receive it. Investors should seek financial advice regarding the appropriateness of investing in any securities discussed in this commissioned research report and should understand that statements regarding future prospects may not be realized. Past performance is not necessarily a guide to future performance. Carnegie and its subsidiaries accept no liability whatsoever for any direct or consequential loss, including, without limitation, any loss of profits arising from the use of this commissioned research report or its contents. This commissioned research report may not be reproduced, distributed or published by any recipient for any purpose. The document may not be distributed to persons that are citizens of or domiciled in any country in which such distribution is prohibited according to applicable laws or other regulations.

This commissioned research report is distributed in Sweden by Carnegie Investment Bank AB. Carnegie Investment Bank AB is a bank incorporated in Sweden with limited liability which is authorised and regulated by the Swedish Financial Supervisory Authority (Finansinspektionen). In Finland this commissioned research report is issued by Carnegie Investment Bank AB, Finland Branch. The Finland branch is authorised by the Swedish Financial Supervisory Authority and subject to limited regulation by the Finnish Financial Supervisory Authority (Finansivalvonta). In Norway this commissioned research report is issued by Carnegie AS, a wholly-owned subsidiary of Carnegie Investment Bank AB. Carnegie AS is regulated by the Financial Supervisory Authority of Norway (Finansitisynet). In Denmark this commissioned research report is issued by Carnegie Investment Bank AB, Denmark Branch. The Denmark branch is authorised by the Swedish Financial Supervisory Authority and subject to limited regulation by the Danish Financial Supervisory Authority (Finanstilsynet).

This commissioned research report is distributed in the US by Carnegie, Inc., a US-registered broker-dealer and a member of FINRA and SIPC. Carnegie's research analysts located outside of the US are employed by non-US affiliates of Carnegie Inc. ("non-US affiliates") that are not subject to FINRA regulations. Generally, Carnegie research analysts are not registered with or qualified as research analysts with FINRA, and therefore are not subject to FINRA rule 2241 restrictions intended to prevent conflicts of interest by, among other things, prohibiting certain compensation practices, restricting trading by analysts and restricting communications with the companies that are the subject of the research report. Research reports distributed in the U.S. are intended solely for major US institutional investors and US institutional investors as defined under Rule 15a-6 of the Securities Exchange Act of 1934. This commissioned research report is provided for informational purposes only and under no circumstances is it to be used or considered as an offer to sell, or a solicitation of any offer to buy any securities. Reports regarding equity products are prepared by non-US affiliates of and distributed in the United States by Carnegie Inc. under Rule 15a-6(a)(3). When distributed by Carnegie Inc, Carnegie Inc. takes responsibility for the commissioned research report Any US person who wishes to effect transactions based on this commissioned research report should contact Carnegie Inc. Investors in the US should be aware that investing in non-US securities entails certain risks. The securities of non-US issuers may not be registered with, or be subject to, the current information reporting and audit standards of the US Securities and Exchange Commission.

This commissioned research report has been issued in the UK by Carnegie UK which is the UK Branch of Carnegie Investment Bank AB. Carnegie UK is authorised and regulated by the Financial Conduct Authority (FCA).

Research Disclaimer

This commissioned research report is provided solely for information. It does not constitute or form part of, and shall under no circumstances be considered as an offer to sell or a solicitation of an offer to purchase or sell any relevant financial instrument.

This commissioned research report has been requested and paid for by the issuer and should therefore be considered a marketing communication (i.e. not investment research). Payment for the report has been agreed in advance on a non-recourse basis. As commissioned research, this material can be considered an acceptable minor non-monetary benefit under MiFID II. It has not been prepared in accordance with the legal requirements designed to promote the independence of investment research. However, it is still subject to a prohibition on dealing ahead of the dissemination of the report.

Carnegie Investment Bank AB is responsible for the preparation of this commissioned research report in Sweden, Finland, Denmark, and the UK. Carnegie AS is responsible for the preparation of this commissioned research report in Norway. Carnegie Inc. is responsible for this research report in the US.

The information in this commissioned research report was obtained from various sources. While all reasonable care has been taken to ensure that the information is true and not misleading. Carnegie gives no representation or warranty, express or implied, about its accuracy or completeness. Carnegie, its subsidiaries and any of their officers or directors may have a position, or otherwise be interested in, transactions in securities that are directly or indirectly the subject of this commissioned research report. Any significant financial interests held by the analyst, Carnegie or a legal person in the same group in relation to the issuer will be referred to in the company-specific disclosures.

Company specific disclosures

The following disclosures relate to relationships between Carnegie Investment Bank AB (with its subsidiaries, "Carnegie") and the issuer or an affiliate.

Carnegie is, or has within the last 12 months been or expects in the next three months to be, party to an agreement relating to the provision of Investment Banking services or an affiliate, or has received from it fees or the promise of fees in respect of such services for the following issuer(s): Lifecare ASA

Parts of this commissioned research report may have been submitted to the issuer prior to its publication.
